

08214 Mid Semester Challenge

If you update your SVN repository and check out the readonly folder you will find a mid-semester challenge. Completing the challenge will help you with your assessment for this module, particularly if you start trying to think about how you could use objects to make tasks easier. The challenge will also help you reflect on what you have learnt so far.

To begin your challenge change in the Program.cs file change the `m_CurrentLab` value to `Lab.Challenge`, then open the scene.html file to get guidance as to what you should do next.

Enjoy!
